EPIK™ DISPENSER FEATURES

Epik™ Automated Towel Dispenser

Automatic, touch-free dispensing reduces the risk of cross-contamination for a more hygienic washroom. Controlled, one-at-a-time dispensing minimizes waste and reduces paper costs.

Adjustable settings for sheet length and dispensing time control usage.

Item# 1890

Epik™ Automated Soap Dispenser

Automatic, touch-free dispensing reduces the risk of cross-contamination and encourages use. Reliable, controlled dispensing eliminates mess, clogs and leaks. No drips!

Item# 1800

Epik™ Manual Soap Dispenser

Manual “push” dispenser provides one hand delivery of soap. A new pump on each refill increases sanitation and stops wasteful, messy drips.

Item# 1801

Epik™ Jumbo Twin Toilet Tissue Dispenser

High capacity dispenser holds two rolls 9” in diameter (equivalent of 11.5 standard 2-ply tissue) for continuous service. Sliding door reduces stub waste by restricting access to second roll before main roll is used up, reducing costs. Durable, plastic dispenser encloses tissue to limit exposure to bowl splash and cleaning fluids, improving hygiene.

Item# 1888

Epik™ Air Freshener Dispenser

Compact, battery-free dispenser creates a passive air freshening system designed with fragrance-loaded, molded material.

Item# 1825
